06
EDITION

THE COLLECTION

A home, chosen by you.

Explore the materials. Compare the finishes. Choose the details that suit you.

01

Start with standard

Review each default option.

02

Make it your own

Select an upgrade if preferred.

03

Add the extras

Kitchen and outdoor options.

01	Exterior walls	03-06
02	Interior walls	07
03	Frame colour	08
04	Entrance doors	09-10
05	Bedroom doors	11
06	Windows	12
07	Flooring	13
08	Bathroom packages	14
09	Sockets / destination reference	15
10	Kitchen cabinetry / optional	16
11	Decks, verandas & roofs / optional	17
12	Appendix / Interior inspiration	18-19

A CLEAR WAY TO CHOOSE

Standard is the default material or configuration. **Upgrade** is an alternative within a required category. Only sections 10-11 are optional add-ons.

Keep the code beside your preferred option. Sockets are matched to your destination; no socket selection is needed.

Photographs show finish and installation examples. Visible furnishings are not automatically included. Colour appearance varies with lighting, screen and print.

01 / REQUIRED

Exterior walls

Choose one exterior finish across pages 3-6. Start with the material.

EPS metal sandwich panels

Metal-faced panels with an expanded polystyrene (EPS) core.

EX-E01

Soft White

STANDARD / Smooth

EX-E02

Charcoal

STANDARD / Smooth

EX-E03

Red Brown

STANDARD / Vertical fine woodgrain

EX-E05

Pale Beige

STANDARD / Vertical woodgrain

EXPLORE AN ALTERNATIVE

For brick, stone, woodgrain or fluted effects, explore the embossed metal cladding on pages 4-6. Select one EX-M code instead of an EX-E code.

01 / EXTERIOR WALLS / 1 OF 3

Embossed metal cladding

Choose one EX-M code for your exterior finish.

WHY CHOOSE EMBOSSED CLADDING?

Get the depth of brick, stone or woodgrain effects in lightweight metal cladding, without the weight of masonry. The metal face does not rot like timber, and its coated finish supports straightforward routine cleaning. Raised patterns add architectural detail; ribs and flutes create a crisp linear rhythm. These practical metal-face benefits also apply to metal-faced EPS panels.

EX-M01

Grey

UPGRADE / Horizontal grooves

EX-M02

White

UPGRADE / Horizontal grooves

02 / REQUIRED

Interior walls

Choose one interior wall finish. Bathroom wall finishes are selected separately on page 14.

IN-E01
Light Greige

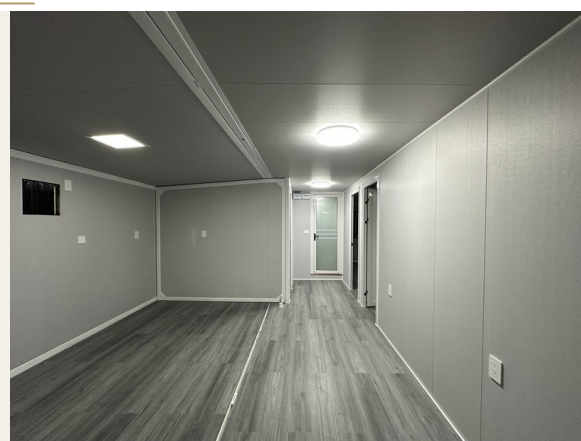

STANDARD / EPS metal sandwich panel

IN-B01
Warm Beige

UPGRADE / Bamboo-wood fibre panel

IN-B02
Light Grey / Fabric effect

UPGRADE / Bamboo-wood fibre panel

IN-B03
Light Grey

UPGRADE / Bamboo-wood fibre panel

WHY CHOOSE BAMBOO-WOOD FIBRE PANELS?

Prefinished composite panels combine a decorative wall surface with practical wipe-clean care, reducing everyday upkeep and avoiding a separate painted finish. Moisture tolerance is a common attraction of this panel category for everyday interiors. Choose Warm Beige for warmth, Light Grey for a neutral scheme, or IN-B02 for a fabric-effect detail.

03 / REQUIRED

Frame colour

Choose one of the three standard frame colours.

FR-BK

Black

STANDARD

FR-WH

White

STANDARD

FR-GY

Grey

STANDARD

CUSTOM COLOUR

A custom frame colour can be requested. Availability and any additional cost depend on the colour selected.

04 / REQUIRED

Entrance doors

Choose one door code here or on page 10. Aluminium alloy doors are offered in black or white.

ED-S01

Single steel door
STANDARD / White only

ED-A01

Double hinged glass door
UPGRADE / Aluminium alloy

ED-A02

Double sliding glass door
UPGRADE / Aluminium alloy

ED-D01

Smart-lock door / Linear
UPGRADE

ED-D02

Smart-lock door / Long pull
UPGRADE

WHY UPGRADE?

Glazed alloy doors

Stiff, lightweight frames support everyday use, while glass brings daylight and views inside. Sliding leaves save swing space; hinged leaves open out from the frame.

Smart-lock doors

Fingerprint and PIN access reduce the need to carry a key every day. A physical key provides another way to enter. Choose the linear face or long-pull style.

04 / ENTRANCE DOORS / CONTINUED

Thermal-break entrance doors

Thermally broken profiles. Available in black or white.

WHY CHOOSE A THERMAL BREAK?

An insulating barrier separates the inner and outer frame profiles, reducing direct heat transfer through the metal. This helps limit unwanted heat loss in colder weather and heat gain in warmer weather. Choose sidelights or a transom for additional glazing around the door, or sliding leaves where you prefer to avoid a hinged door swing.

ED-T01

Double hinged
UPGRADE

ED-T02

Double hinged + sidelights
UPGRADE

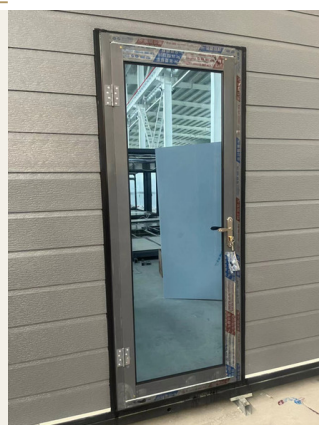

ED-T03

Double hinged + transom
UPGRADE

ED-T04

Unequal-leaf double door
UPGRADE

ED-T05

Single hinged glass door
UPGRADE

ED-T06

Double sliding glass door
UPGRADE

05 / REQUIRED

Bedroom doors

Choose one door type for the bedrooms, or note any room-specific requirements.

STANDARD / ALUMINIUM-WOOD

BD-A01
White aluminium-wood door

STANDARD / The default bedroom door.

UPGRADE / COMPOSITE WOOD

BD-C01
Composite wood door

UPGRADE / Composite wood

WHY CHOOSE THE COMPOSITE WOOD DOOR?

Composite wood combines wood-based elements in an engineered construction. This approach can limit the movement associated with solid timber, helping the door retain its shape in daily use. The defined face pattern and dark hardware add a more residential furniture-like finish. Choose it for this balance of material character and interior coordination.

06 / REQUIRED

Windows

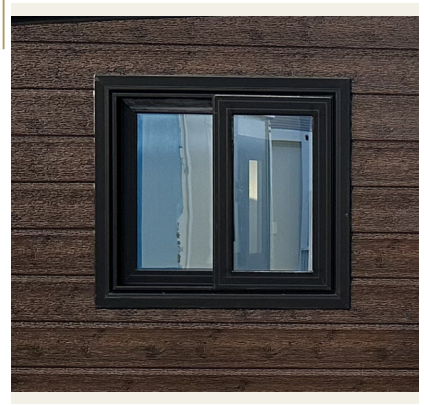

Choose your preferred window system.

WN-P01

uPVC sliding
STANDARD

WN-A01

Aluminium alloy sliding
UPGRADE

WN-T01

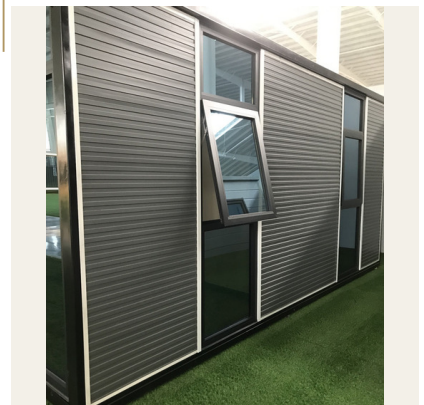

Thermal-break sliding

WN-T02

Thermal-break awning
UPGRADE

WN-T03

Thermal-break awning
UPGRADE

WN-T04

Thermal-break awning
UPGRADE

COMPARE THE UPGRADES

Aluminium alloy sliding: stiff, lightweight profiles support durable frames with simple routine care. Sideways opening leaves nearby space clear of a swinging sash.

Thermal-break: an insulating barrier reduces heat flow through the profile, helping limit winter heat loss and summer heat gain. Sliding versions save swing space; top-hinged awning versions provide an outward-opening ventilation option.

07 / REQUIRED

Flooring

Choose one material and one finish. Each code identifies both.

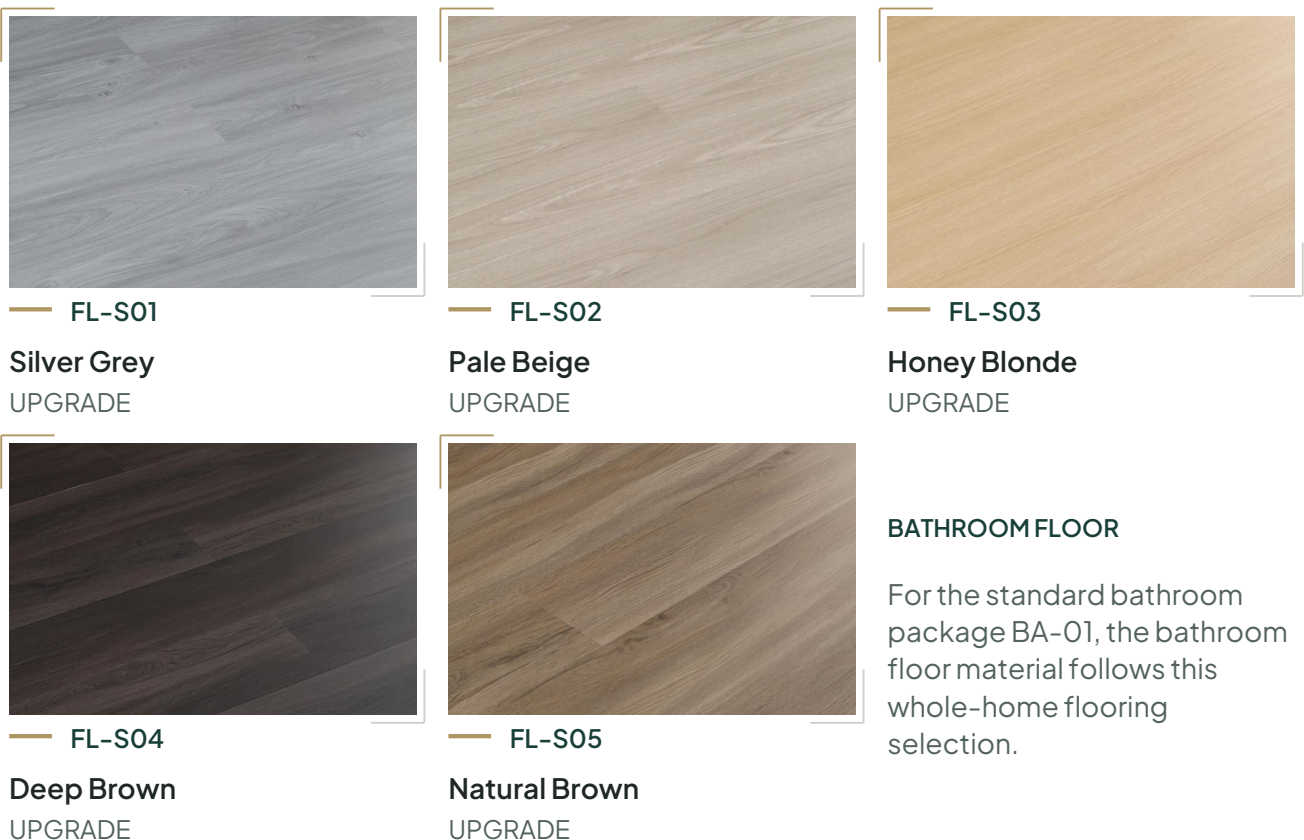

STANDARD / SHEET VINYL (PVC) FLOORING

Flexible vinyl flooring supplied in sheets, with a woodgrain appearance.

UPGRADE / SPC RIGID-CORE FLOORING

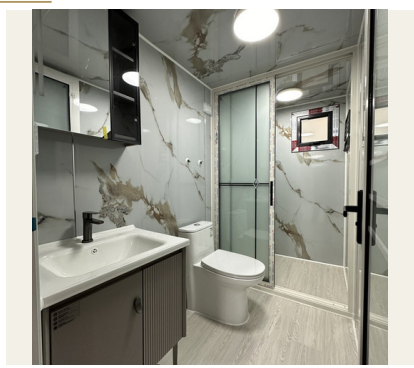

SPC has a dense mineral-polymer core that supports resistance to indentation under everyday furniture and helps the planks retain their shape. Its moisture-resistant core and wipe-clean surface make routine spills easier to manage. The rigid plank format adds a defined board-by-board appearance in your chosen wood-effect finish.

08 / REQUIRED

Bathroom packages

Choose one finish package. Installation scenes may show earlier door styles; shared door references appear below.

BA-01

Standard
STANDARD

WALL FINISH

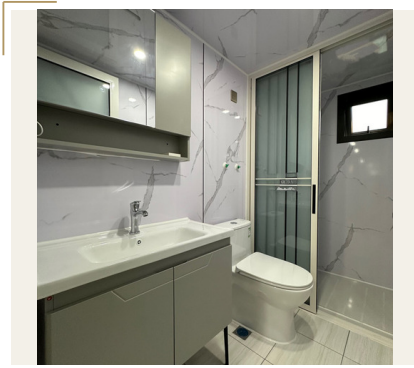

UV-coated wall panel

WASH-AREA FLOOR

PVC or SPC*

SHOWER-AREA FLOOR

PVC or SPC*

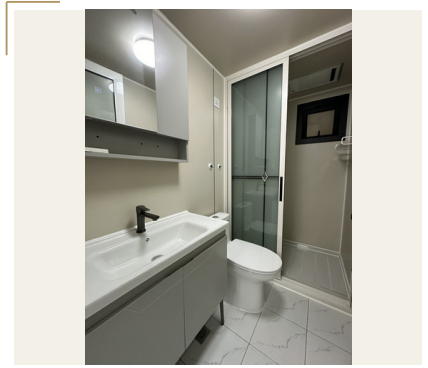

BA-02

Porcelain Shower Floor
UPGRADE

UV-coated wall panel

Ceramic tile

Porcelain Shower Floor

BA-03

SPC wall panels
UPGRADE

SPC wall panel

Ceramic tile

Porcelain Shower Floor

* BA-01 follows your PVC or SPC flooring selection on page 13.

WHY CHOOSE THE UPGRADED FINISHES?

SPC walls: rigid, moisture-resistant panels with wipe-clean surfaces and fewer grout lines than small-format tiles. **Ceramic tile:** a hard-wearing, easily cleaned wash-area floor. **Porcelain Shower Floor:** a textured porcelain floor panel with grooves and a surrounding drainage channel.

SHARED DOORS / ALL THREE PACKAGES

Bathroom door

Slim-frame reeded glass.

Softens views for privacy while passing light. A hinged leaf gives a familiar opening action.

Shower door

Slim-frame reeded glass.

Adds privacy with a light visual frame. Sliding leaves save the space needed for a door swing.

10 / OPTIONAL ADD-ON

Kitchen cabinetry

Add a cabinet package if needed. Wall cabinets are a separate addition.

KC-E01

Melamine-faced board cabinetry

OPTIONAL / Quartz worktop + stainless-steel sink

KC-P01

Plywood cabinetry

OPTIONAL / Quartz worktop + stainless-steel sink

WHY CHOOSE PLYWOOD CABINETRY?

Cross-laminated wood veneers give plywood strength and dimensional stability, helping cabinet panels resist movement. Good screw-holding supports hinges and other fixings during repeated daily use. It is a practical choice for durable cabinetry with a strong core. The quartz worktop and stainless-steel sink are included with either cabinet package.

KC-W01 / OPTIONAL WALL CABINETS

Extra storage above the worktop

Available with either cabinet package, with the material and colour matched to the base cabinetry.

No kitchen package is selected by default. Appliances, furniture and decorative items in the reference images are not part of the listed cabinet package.

11 / OPTIONAL ADD-ON

Decks, verandas & pitched roofs

Choose one bundle, or leave this section out. No bundle is selected by default.

OD-01

Open deck

OPTIONAL

A deck without a canopy.

OD-02

Veranda

OPTIONAL

A covered outdoor deck adjoining your home.

OD-03

Veranda + pitched roof

OPTIONAL

A covered outdoor deck, plus a pitched roof for the home.

MATERIALS & COLOURS

Deck: wood-plastic composite (WPC), 2 m wide.

Canopy and pitched roof: EPS metal sandwich panels.

Frame colours: black, white or grey. Custom colours may be requested; any additional cost is confirmed separately.

APPENDIX / 1 OF 2

Interior inspiration

Real showroom spaces to help you picture walls, flooring and furnishings together.

01 / LIVING & DINING

See the finishes in context.

Light wall colours and pale wood-effect flooring form a calm backdrop. Dark framing defines the room, while furnishings show how living and dining can share the space.

Showroom inspiration. Furniture, styling and layouts shown are not a supply specification.

APPENDIX / 2 OF 2

A closer look at everyday living

Use these scenes to compare the overall effect of your preferred finishes.

02 / LIVING SPACE

One coordinated interior.

A long view brings the wall finish, wood-effect floor and contrasting frame into one scene. Notice their relationship across the room.

03 / BEDROOM

A quieter setting.

Neutral walls and a pale floor keep the smaller room visually light. The window and dark trim show the same materials at a more intimate scale.

Showroom inspiration. Furnishings are not automatically included; layouts and details may vary.
